EXECUTIVE ERP EVALUATION AND INVESTMENT ROADMAP

Developed for the Modern Business

In today's business world, with so many solutions to consider across Enterprise Resource Planning (ERP), Customer Relationship Management (CRM), inventory management, and ecommerce—the task of choosing one or more may seem daunting. Although choosing the right solution and provider for your organization may be a long, taxing process, the rewards can be substantial. The right ERP system, implemented efficiently and built to enable the business's strategy, can:

- Create a happier working environment.
- Improve your profit margins.
- Increase revenue.

The ERP experts at NetSuite have built this guide to help you and your team make a decision about the solution that works best for you and to help set you up for a successful

implementation. The process outlined in this guide is a widely-accepted evaluation process and is a valuable exercise for any major technology implementation project.

How will this guide help you to successfully select a software solution for your manufacturing business? First, it will help guide you toward the reason and value for making a change; second, it will align your organization on the specific benefits of a new software solution across all of your operations.

Thank you for taking the time to meet with me and review the Executive ERP Evaluation and Investment Guide—we hope to be given the opportunity to work through this process with you.

Sincerely, The NetSuite Team

Why are we beginning this journey?

Should our organization be looking at purchasing new software?	Yes	No
Do you have general or industry-specific requirements beyond the ability of your current system?		
Are you unable to use the data or is it taking up too many resources and too much time to analyze data?		
Does your current system architecture require duplicative and/or redundant data entry?		
Are your employees, partners and vendors able to access company data over the web and via mobile devices? Is this something you could benefit from?		
Does lack of flexibility hurt your company's ability to keep up with new and more complex business processes?		
Can you use your system to automate sales orders, invoicing and/or other industry- specific requirements?		
Is key information and business intelligence unavailable throughout your company?		
Does your current Accounting/ERP system timeout or under-perform?		
Does your company rely on manual processes, double entry and/or spreadsheets?		
Is the production of financial statements time-consuming and error-prone? Can you easily perform inter-company transactions?		

There should always be value tied to change—financial or otherwise. This exercise is meant to explore the largest opportunities within your organization and help you capture value. Use this section to identify, understand, quantify and align the most important opportunities within your organization.

	Opportunities (list top 3) "What keeps you up at night"?	What type of benefit can be achieved? Financial, Morale or Other	How much is the opportunity worth to your organization?	Why is this one of your largest opportunities?	What is preventing you from capturing the benefit?	What is the first step to capturing the benefit?
1						
2						
3						

If these opportunities are achievable in some way, what would you be willing to pay to capture all of the above listed value?

Vhat is your organization's long term vision in 100 words?	

\$

Strategy

Building and executing a strategy is essential in achieving your organizations long term vision. Use the section below to establish key strategic points in various areas of your organization to help align your internal priorities. This will not only help identify day to day priorities, it will also help identify priorities in a digital solution.

Organic Growth	Regulatory Compliance
External Growth, Expansion, Mergers and Acquisitions	Organizational Structure
Technology and Data	Core Financials

Joint Execution Plan

The evaluation process for a new digital solution and partner can be challenging and time consuming. The Joint Execution Plan (JEP) can be used to track key milestones and deliverables throughout your selection process. It will also be a valuable tool to help hold the various vendors accountable to your timeline.

Engage

Ask your employees for the best and worst thing about the current system.

Employees are your best resource to better understand your day to day issues. Taking some time to listen to what they have to say does a few things.

- 1. It helps you get a better understanding of what impacts their moral and ability to get the job done.
- 2. It will build engagement and buy in for a new digital strategy and solution.
- 3. It will help leadership discuss the change that is coming, prepare the employees for change and reduce any surprises.

Align

The alignment section of this document can be used to review each major process throughout your organization. The suggested use of this section is to:

- 1. Speak to the process owners and have them describe the process.
- 2. Draw the process.
- 3. Identify the process gaps, breakdowns and shortfalls.
- 4. Complete time studies on the processes to quantify the process gaps. Once you know the details and opportunities within each process, you can better understand the monetary opportunity by streamlining each process.

NetSuite SuiteSuccess "Zero to Cloud in 100 Days"

At NetSuite, innovation is at the core of what we do and how we deliver value to our customers. SuiteSuccess is a transformative customer engagement methodology designed with leading practices and years of experience in cloud ERP implementation and industry knowledge to help our customers meet their business needs and industry requirements. Using an agile and phased approach that starts with sales and continues through implementation, SuiteSuccess enables us to provide our customers with what's needed for a successful ERP implementation in record time. Moreover, comprehensive post implementation support ensures that customers always get the most out of their NetSuite cloud ERP. With SuiteSuccess, NetSuite delivers unprecedented customer experience and tangible business outcomes.

- For You SuiteSuccess was designed with industry and role specific functionality that empowers every user with a solution built for their day to day needs and tasks.
- End-to-End Customer Engagement Model –
 Consistent engagement from sales to service,
 to support and beyond allows customers to
 start their implementations from the first time
 they speak with a NetSuite sales person.

- Vertical specific solution with leading practices built in – Including modules, workflows, reports, KPIs, analytics built up and continually improved based on successful implementations in thousands of companies.
- Intelligent Phased Approach Allows
 customers to rapidly implement the product
 in manageable segments, deliver success
 quickly on solid foundations and introduce
 new capabilities when needed. Ensuring
 customers always remain competitive and
 never fall behind or fall victim to long drawn
 out "big bang" projects.
- Flexibility and Scalability Allows customers to add their own unique requirements where needed and scale around the globe.
- Zero to Cloud in 100 Days Proven rapid ROI.
- Success Deliver what we sell and sell what we deliver.
