KGiSL
Empathy-based outcomes™

Unlock the full potential of offshore Development Centres (ODC) with 30%+ cost saving from the first year.

KGISL is a leading Offshore Development Centre (ODC) partner of global organisations, helping them outsource or setup IT development centres in Coimbatore, India to leverage the low cost of development while innovating from a highly skilled pool of consultants.

Our customised engagement models, flexible cost structure, in-house infrastructure and a large talent pool makes us a preferred outsourcing partner for global majors. Over the last two decades, we have set up 10+ ODCs in Coimbatore for global clients of capacity ranging from 10 seats to 3000 seats.

30% + assured cost saving	Matured agile process	Singapore time zone support	Scalability based on demands	Flexible engagement models

What do we offer?

Custom application development & product implementation	Application maintenance services	Quality Engineering (Software testing)	Operations & Support

How KGISL offers cost-effective, flexible and scalable Offshore Development Centres?

Location advantage - Coimbatore brings the cost benefit of being a Tier-II city while offering the advantages of a cosmopolitan city - good connectivity, large talent pool, presence of leading technical institutions, preferred environment and presence of enabling IT infrastructure including SEZs. Besides, low attrition rates make the city more attractive.

Captive infrastructure - Our 50-acre campus in Coimbatore, India, houses well secured physical and IT infrastructure with all required facilities to accommodate ODC of various capacities allowing clients to quickly set up operations.

Reduced cost of ownership - Lower cost of real estate, manpower and other associated costs translate to a large operational cost saving for organizations who want to set up centres with KGISL. Additionally, centres operated and managed by KGISL experiences YOY saving of more than 5%.

Technology skillsets - Our 2000+ highly skilled IT professionals are experts across technology landscape & agile / devOps methodologies. Our technology and domain specific Centres of Excellence (CoE) provide support in the form of proprietary frameworks, trainings and technical support.

Strategic consulting & Support for Offshoring - Consulting and support on ODC design and implementation including sizing, core-flex team structure, governance and infrastructure.

Scalability - Resource and infrastructure scalability based on demand fluctuations

Flexible Engagement Model - We offer flexible & customised delivery models – Dedicated offshore, Shared, BOT (Build, Operate, Transfer), BOM (Build, Operate, Manage) at competitive costing as per clients' needs
