# Products for Insurance

**Robust. Efficient. Mature.**

End-to-end software solution for **Insurance & Takaful business**

that enable insurers to be

**Transformational. Operational. Proven.**

**Core Insurance Suite for  
Conventional Operations**

## NSure Suite of Solutions

A fully integrated web-based application enabling customers and agents generate online policies based on parameters set in underwriting guidelines.

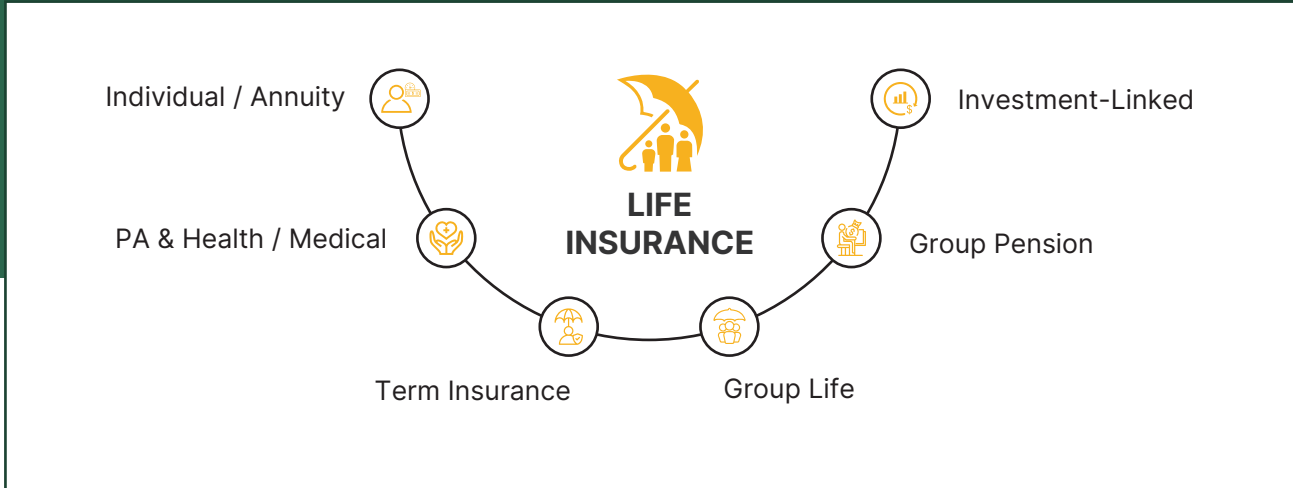

NSure suite of digital solutions help insurance firms leverage the power of automation to enhance business performance, efficiency & productivity.

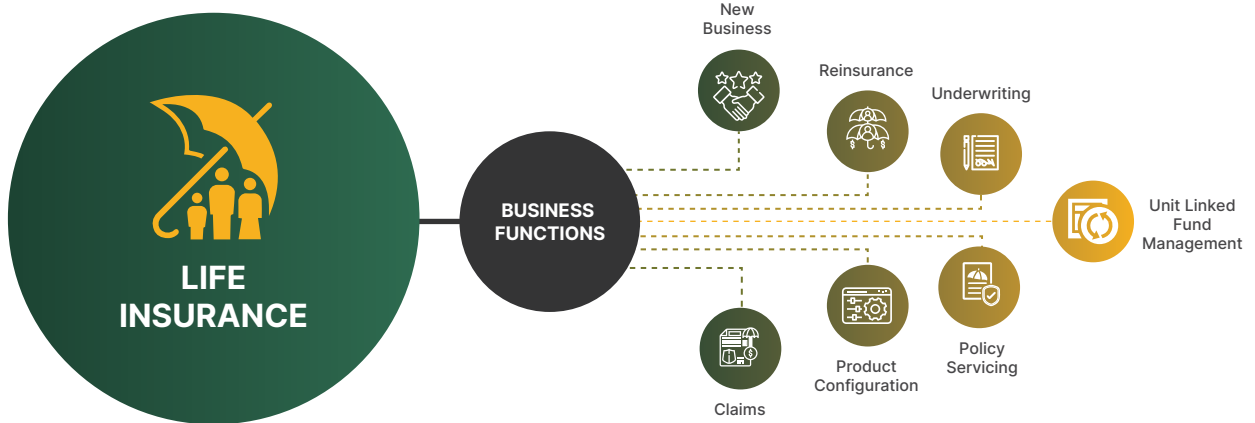

A complete and proven, end-to-end, claims tracking and management system for insurance carriers that accelerates claims resolution & reduces administrative and settlement costs.

# NSure Life

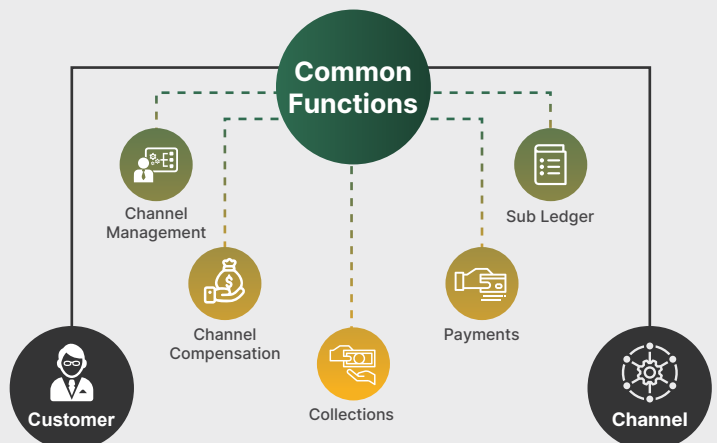

NSure Life governs insurance processes and operations seamlessly in real-time for Insurers protecting Individual life, group life and health. Supports Traditional Life, Annuities, Unit-Linked, Health/Medical, Mortgages, Group Term, Group Medical, Group Savings Scheme, Group Unit-Linked, Group Pension, Universal Life, etc.

The business functions for Life Insurance, such as product configuration, new business, unit-linked fund management, underwriting, policy servicing, reinsurance and claims spans across all lines of business.

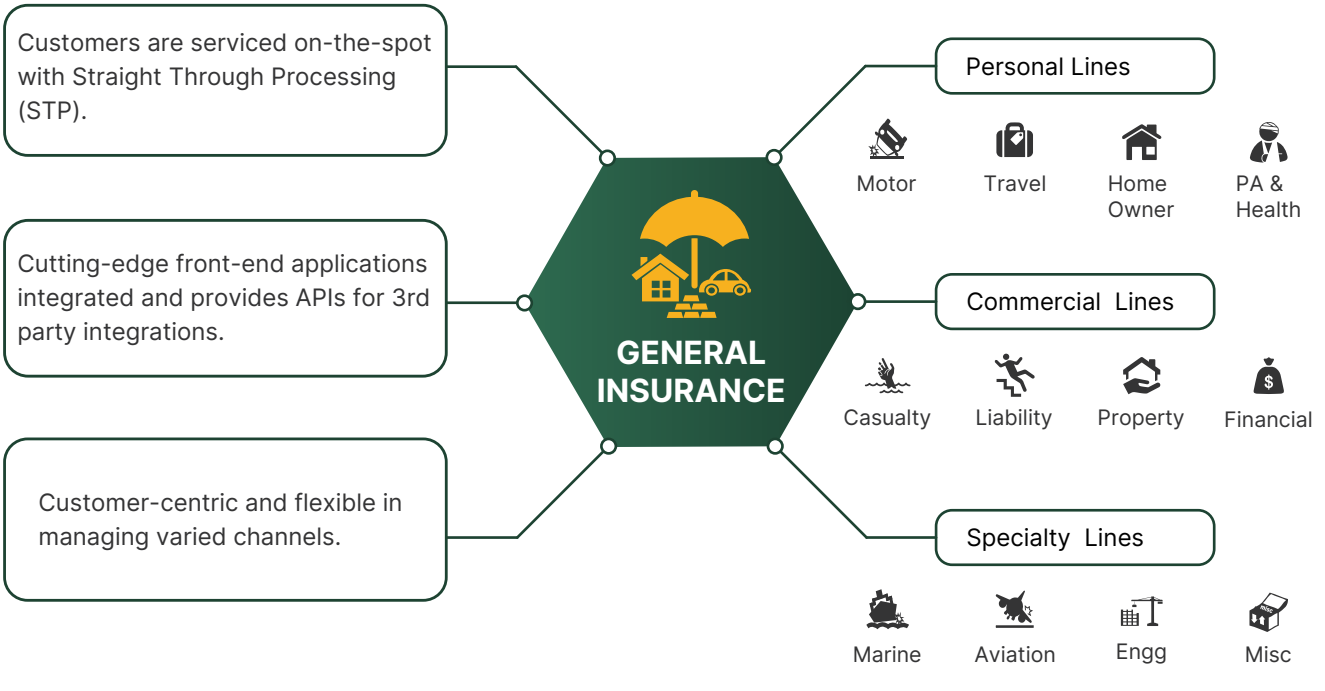

The base common functions, such as channel management, channel compensation, collections, payments, and subsidiary ledgers are handled in building blocks to give you the flexibility of changing business arrangements. The entire profile of the customer is kept in one place to assess total risks, up-sell and cross-sell to your customers.

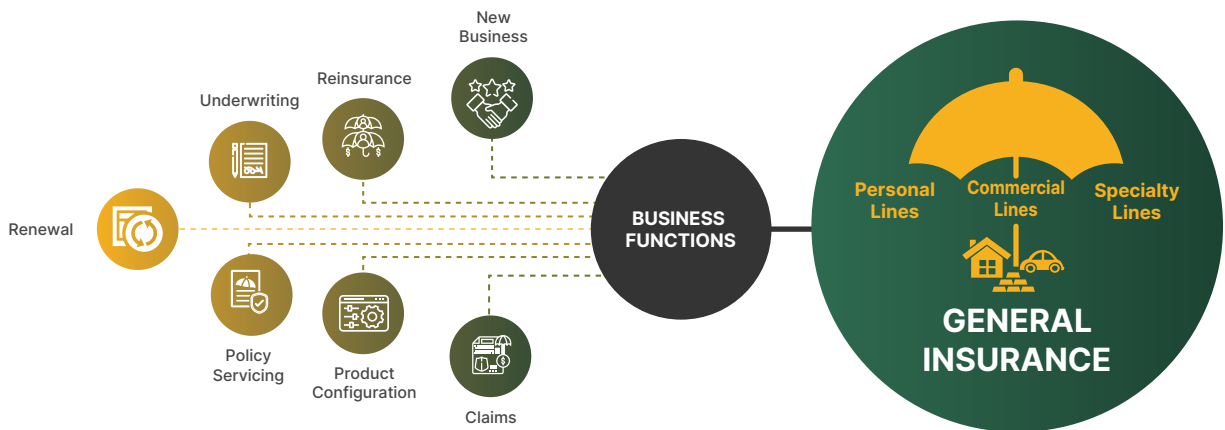

# NSure General

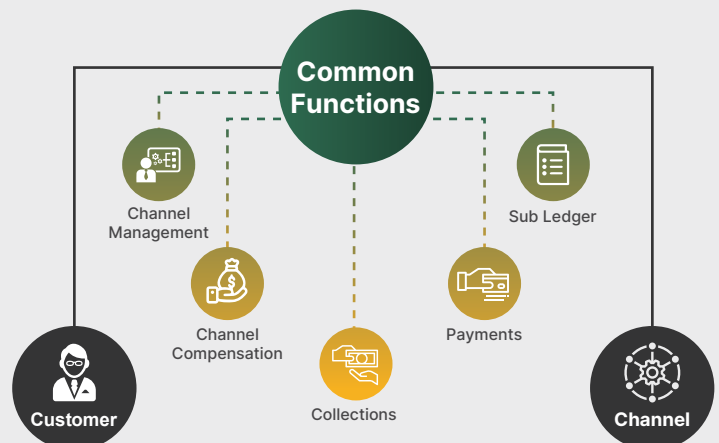

NSure General, administers insurance processes and operations seamlessly in real-time to protect property & casualty with Personal, Commercial & Specialty Insurance.

Common business functions for General Insurance, such as product configuration, new business, renewal, underwriting, policy servicing, reinsurance and claims span across all lines of General insurance.

The common functions are handled in configurable plug and play components to give the flexibility to change according to business needs. The entire customer profile is kept in a single repository to assess total risks, up-sell and cross-sell to customers. The channel profiles are also kept in a single repository to manage and compensate the entire portfolio of the channels.
